- Categorized and searched products intuitively.
- Integrated payment gateways.
- Improved platform accessibility and usability with user feedback.

### NFT Project

- Customized MetaMask wallet plugin for NFT ecosystem.
- Developed proprietary plugin to reward users with incentives.
- Integrated APIs to enable OTP functionality for security.

# PERSONAL PROJECT

---

## Dynamic Weather App

Designed and developed a dynamic Weather App utilizing React.js, showcasing real-time weather data fetched from an API using Axios. The application offers users an intuitive interface to access up-to-date weather information, with visual cues provided by changing images based on the current weather conditions.

**Technologies Used:** Reactjs, CSS, Axios, JSX, API

## Password Generator

Password Generator App using ReactJS that allows users to create strong and customizable passwords tailored to their needs. The app, hosted on Firebase, enables users to choose password length and character sets, and offers seamless copying to the clipboard. With a CI/CD pipeline in place, I've ensured smooth deployment for a reliable user experience."

**Technologies Used:** JavaScript, JSX, Firebase, reactjs, Cascading Style Sheets (CSS)
